

MOBIUZ Gaming

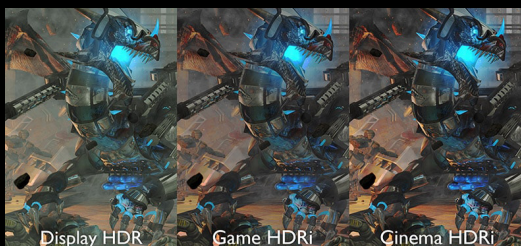

MOBIUZ™

Imagine a New Reality

What Makes BenQ Gaming Monitors So Special?

Expanded Immersion by HDRi Technology *Gaming On A Whole New Level*

You're in control. Beyond Standard HDR, you can choose Game or Cinema HDRi. Game Mode reveals details in the shadows, while Cinema Mode adds saturation for games with vivid color.

Superior True Sound by treVolo

Clear your desk of external speaker clutter and enjoy full-range, balanced audio. Custom sound modes and 2.1 channels with a built-in subwoofer add dimension to your audio.

Light Tuner

Choose from 20 brightness levels for your favorite effect. Customize your view from dark caves to open deserts for an almost unfair advantage.

Black eQualizer

Brighten dark areas on your display without overexposing and washing out bright areas. No monster, foe, or reward can hide from you with Black eQualizer engaged.

Color Vibrance

Get the best color performance from your games. You see vivid color and notice how vibrant details pop with Color Vibrance.

AMD Free-Sync™

Smooth display of tear- and stutter-free images keeps you in the game. Fast-paced action is seamless and engaging.
